

## SCHOOL MANAGEMENT SYSTEM (Laravel 12 + MariaDB)

PROJECT NAME School Management System / ERP

### TECHNOLOGY

- Laravel 12
- PHP 8.x
- MariaDB
- Blade Templates
- Tailwind CSS
- VSCodium IDE

DATABASE school\_management

CURRENT STATUS System is being rebuilt based on legacy ERP data.

### MASTER DATA SOURCE TABLES (DO NOT MODIFY STRUCTURE)

#### 1. FeeMstStudent Purpose: Student Profile Master

Primary Relationship Field: Studentid

Important Columns: Studentid studname fathername mothername gender birthdate fathermobile mothermobile adharid locaddr religion nationality admitdate saralid admitstdid

Records: 1018 (2025 data only)

---

#### 1. SubStudentMst Purpose: Student Academic Master

Primary Relationship Field: Studentid

Important Columns: Studentid regno standardid divisionid rollno paymodid yearid sectionid SubStudid id tranflag transtaplicable subrouteid routeid scholarshipstype

Records: 1018 (2025 data only)

Relationship:

## FeeMstStudent.Studentid

SubStudentMst.Studentid

Verified: 1018 matching students 0 missing profiles

---

## IMPORTANT RULE

FeeMstStudent and SubStudentMst

must remain exactly as imported from legacy ERP.

Do NOT modify these tables.

All ERP screens should fetch data from these tables.

---

## SECTION IDs

1022 = PRE - PRIMARY SECTION 1023 = PRIMARY SECTION 1024 = SECONDARY SECTION 1025 = HIGHER SECONDARY SECTION

---

## YEAR DATA AVAILABLE

2017 2018 2019 2020 2021 2022 2023 2024 2025 2026

Current working year:

2025

---

## CURRENT LOGIN FLOW

Login → Selection Page → Dashboard

---

## SELECTION PAGE

Controller: app/Http/Controllers/SelectionController.php

Purpose: User selects Academic Year + Section

Stores session:

```
session([ 'yearid', 'sectionid', 'year_name', 'section_name' ]);
```

Example:

Academic Year: 2025-2026

Section: PRIMARY SECTION

---

## LAYOUT

File:

resources/views/layouts/app.blade.php

Header contains:

School Logo

PRAJNANABODHINI ENGLISH MEDIUM SCHOOL & JR. COLLEGE

SHIRGAON / CHIKHALI

After section selection:

Academic Year : 2025-2026 Section : PRIMARY SECTION

shown on every page.

---

## NAVIGATION

File:

resources/views/layouts/navigation.blade.php

Requirement:

Before section selection: NO MENU

After section selection: Show

Dashboard Masters Students Examination Reports Administration Profile Logout

Navigation should be wrapped using:

```
@if(session('sectionid'))
```

```
...
```

```
@endif
```

---

## CURRENT MASTER TABLES

standards divisions sections academic\_years subjects subject\_types standard\_subject\_allocations

These tables already exist.

Need to synchronize with FeeMstStudent/SubStudentMst.

---

## STUDENT MASTER

Future source:

FeeMstStudent JOIN SubStudentMst

using Studentid

NOT:

students student\_academic\_records

---

## MARK ENTRY MODULE

Already started.

Requirement:

Teacher selects:

Academic Year Standard Division Subject

Then grid:

GR.NO. ROLL NO. STUDENT NAME MAX MARK PASSING MARK OBTAINED MARKS

Teachers can enter marks only for assigned subject.

Report card should later combine all subject marks.

---

## EXAM MODULES CREATED

Exam Master Exam Subject Allocation Marks Entry

Need further development.

---

## REPORTS

Student Profile page exists.

Need to fetch from FeeMstStudent.

Display format:

Two-column profile page Not editable Search box on top

Fields:

Studentid regno studname fathername mothername gender birthdate fathermobile mothermobile  
adharno locaddr religion nationality admitdate saralid

---

## IMPORTANT DATABASE DECISION

Going forward:

# FeeMstStudent

Student Profile Master

# SubStudentMst

Student Academic Master

All ERP pages should use these two tables as source of truth.

Existing tables can remain temporarily for compatibility but future development should be based on these two master tables.

---

## NEXT TASKS

1. Fix Selection Page UI.
2. Hide navigation before section selection.
3. Build Student Master using FeeMstStudent + SubStudentMst.
4. Connect Standards/Divisions/Sections from SubStudentMst.
5. Complete Marks Entry.

6. Create Report Card.
7. Attendance Module.
8. Student Promotion Module.
9. User Role Permission Module refinement.
